How Do I Set Up Avast Software for the First Time?

You've installed Avast, opened the app—and now you're 📱 1-855-285-0870 staring at a dashboard full of options.

- 👉 *Is your device already protected?*
- 👉 *Do you need to turn anything on?*
- 👉 *What should you do first?*

This is where many first-time users get stuck.

Installing Avast 📱 1-855-285-0870 is only the starting point. Proper protection begins when you **configure the right settings, activate features, and run your first scan.**

If you skip setup steps, your system may still be exposed to 📱 1-855-285-0870 threats—even though Avast is installed.

This guide walks you through a **complete first-time setup process**, designed to get your device fully protected in under 20 minutes.

◆ Quick **Answer** (Fast Method Ready)

To set 📱 1-855-285-0870 up Avast for the first time, install the software, open the app, log into your Avast account or activate your subscription, update virus definitions, enable real-time protection, and run a full system 📱 1-855-285-0870 scan. Then configure features like web protection and scheduled scans for ongoing security.

What Does “Setting Up Avast” Actually Mean?

Setting up Avast includes:

- Activating your account or subscription
- Enabling all protection shields
- * → 📞 1-855-285-0870 Updating virus definitions
 - Running an initial scan
 - Configuring essential settings

👉 In simple terms: turning Avast into a **fully active security system**, not just an installed app.

Pre-Setup Checklist (Before You Start)

Make sure → 📞 1-855-285-0870 you have:

- Avast installed from official source
 - Internet connection
 - Avast account login (if applicable)
